Gary,

We are planning to transport approximately 40 tons of caustic tank bottoms with crude oil (K 169 / D002) that are currently contained in TANK 20 at the Falcon Refinery (EPA ID # TXD086278058).

The material will be transported in a vacuum box to the managing facility - U.S. Ecology in Robstown, TX - EPA ID TXD069452340, Texas Solid Waste Registration # 50052.

The one time shipment number is B2Z7603H.

U.S. Ecology will process the material by thermal recycling, since the materials are high in oil/hydrocarbon materials.

The two attachments included in this e-mail are the TCEQ's Waste Shipment Summary and the caustic tank bottoms profile.

Should you have any questions please contact me.

Alonzo

Ron:

Could you let me know if US Ecology, Robstown, TX is approved for CERCLA waste. The waste that will be shipped is K169. I need this information ASAP.

Thanks
